

We always keep a distance of 1.5 meters.

Corona protocol for safely conducting the technical inspection. For your and our health.

Perfectkeur

If a distance of 1.5 meters is not possible, then a mouth mask is mandatory.

Max. 4 attendees incl. inspector. A maximum of 1 person walks along with the inspector.

Other involved parties wait outside. The inspector will give an explanation afterwards.

The inspection will be terminated if the conditions are violated.

No people may be in quarantine or with corona-related complaints in the home.

It's not allowed to carry out a home appraisal or other activities during the technical inspection.

Fever, cold, cough? Then you are not allowed to be present at the inspection.

# Corona protocol for safely conduction of the inspection for your and our health

## Guidelines from Government / RIVM

- Do not shake hands
- Wash hands often
- Keep a minimum distance of 1.5 meters
- Cough or sneeze into your elbow
- Use paper tissues
- Max 4 people present in a home

## Additional measures Perfectkeur

During an inspection, a maximum of 1 person may walk along during the inspection. The following rules apply:

- The inspector is always alone in smaller rooms, the door is the boundary.
- If it is not possible to keep a distance of 1.5 meters, the inspector may decide that a mouth mask must be worn.
- The inspector summarizes his findings per room or floor.
- Other interested parties are brought up to date by the inspector after the inspection outside the home.

## Pay attention:

Practice teaches us this. The inspector must repeatedly advise the person walking along to keep a distance of 1.5 meters. This is hindering our inspector. If the inspector has to give a second warning, the inspector has the right to terminate the inspection.
